**TIE Commerce achieves  
"Powered by SAP NetWeaver®" certification**

TIE Kinetix Master Data Management Solution is certified for  
integration with SAP

BURLINGTON, Mass. (December 17<sup>th</sup> 2007)—TIE Commerce, Inc., a leading provider of Business-to-Business eCommerce software today announced that it has received integration certification from SAP for integration with SAP's XI 3.0. For all SAP users who want to migrate to the new SAP platform, TIE has a complete integration solution with TIE Kinetix.

*"TIE Commerce is pleased to have been certified by SAP," said Dick Raman, President and CEO of TIE Commerce. "With our interface software, TIE has provided a software solution for SAP's current and future technologies, ensuring an easier transition for SAP's customer base to the new XI environment."*

TIE's Master Data Management solution gives customers a single view of strategic data across the enterprise. Customers who implement Master Data Management within their organizations deliver timely, accurate and consistent data about their products improving efficiency throughout their operations. Available as both a software license and as a service (SaaS), solutions enable companies to optimize internal business processes and enhance their ability to connect with external trading partners and customers.

SAP NetWeaver is built using open standards and industry de facto standards and can be extended with, and interoperate with, technologies such as Microsoft .NET, Sun Java EE, IBM WebSphere and now TIE Kinetix.

TIE currently has many customers in different countries that have the TIE software integrated with SAP. Because the TIE SAP R3 Connector and the new TIE SAP XI Connector can run together, current TIE customers have a defined upgrade scenario.
