

eInvoicing

TIE e-Invoicing Solution: TIE introduces a solution for paperless invoicing

How quickly do you want to start saving?

The savings have been estimated at one to two dollars per invoice for outgoing bills sent to customers. However more recent research has shown that the savings opportunity on the receiving end is a minimum of twelve dollars per invoice.

TIE has introduced a new solution which enables you to take giant step forward by eliminating paper invoices, unlocking the potential to start saving tens of thousands of dollars!

The Reality:

More and more organizations realize that communicating electronically can lead to considerable savings.

Typically, invoices are received on paper; get a date stamp and are manually entered in the accounting system. Some businesses even scan the paper invoice for additional electronic circulation. Only in very rare circumstances are incoming invoices integrated automatically into back office systems, linked to shipments, or are approved by managers within that or another location. TIE's eInvoicing Solution can save money by automating each aspect within your purchasing and billing approval process chain. The TIE e-Invoicing solution offers you savings for both the manual inbound processes and fully integrated eCommerce scenarios.

The advantages of TIE's e-Invoicing Solution at a glance:

- Unique, one single solution for both your incoming and outgoing invoice flow
- Simple interface through a internet browser
- Short implementation period
- Powerful integration software that connects with current and future business applications
- Flexible and easy to operate
- Enormous cost savings and clear return on investment

TIE has over 20 years experience helping companies process electronic invoices and conduct business virtually. Our software solutions and services have enabled TIE customers to send and receive over a half billion electronic invoices. The TIE Kinetix platform provides flexible solutions that support all processes related to invoicing. TIE Kinetix works with all existing financial and logistic systems and provides a fast and efficient return on investment.

A decorative graphic in the top left corner consisting of several white and one orange sphere on a grid of light blue lines, with a blue gradient background.

For the Accounts Payable TIE's eInvoicing Solution covers:

- Handling of any digital format
- Scanning of paper invoices including digitizing the content
- Full integration with any accounting system or the financial ERP systems
- Automated workflow for approval based on roles and procurement per department and/or employee
- Signaling of automated routing if approvers fail to follow-up on workflow processes
- Automated rules for orders and/or shipment error reports
- Pre-built interfaces for resolving billing disputes with suppliers
- Archiving of invoices received
- An easy to use repository for finding back invoices based on their content

For your Accounts Receivable TIE's eInvoicing Solution covers:

- Sending and archiving in line with tax rules for e-invoicing, by using EDI and .pdf with advanced signature capabilities
- Automatic matching overview if required by business partner
- Invoice presentation can be changed in every usable format per customer

Save Money, Eliminate Errors, Expedite Processes!

Don't take our word for it.

"With the TIE e-Invoice solution we have now made our approval process electronic and it is now available for our budget holders, even when they work from home. Invoices are checked more effectively and faster and can't disappear under the 'stack of papers'."
